

APOLLO ENVIRONMENTAL SOLUTIONS (AES) AMOLDBUSTER

SANITIZATION AND DISINFECTION PROTOCOL

Effective May 12, 2020, AES a 3rd Party Industrial Hygiene Firm focused on the reduction of Covid-19, has designed a sanitization and disinfection Protocol to benefit our local communities. Our Protocol is prepared and designed for a specific subject individual property and is to be used as a guidance document and help assist a contractor in performing coronavirus sanitization and disinfection services along with understanding our recommended five (5) specific levels of cleaning, sanitization, disinfection, engineering controls, and PPE requirements, etc. AES Site-Specific Sanitization and Disinfection Protocol will be delivered in a pdf format. There are several factors that will need to be obtained to prepare and write a site specific Protocol, including: property information (i.e. sq. footage, floors, type of usage, etc.), low risk property vs. high risk property, client expectations and needs, property location, occupied vs. unoccupied.

In addition, verification of contractor's processes will be verified by AES staff and secondarily via the National Organization of Remediators and Mold Inspectors (NORMI) www.normi.org and a sperate applied Certification of Sanitization will be issued directly to site owner and/or managership.

To begin such processes, we humbly request that you contact our office today directly @ 866.807.5313 and/or visit us on the web @ www.amoldbuster.com.
